

2° COMPLEXITY MANAGEMENT LITERACY MEETING Fiesole 2015

LA SCHEDA DEL “LIBRO CONSIGLIATO”

da *Emilio Iannarelli*

1. TITOLO – “GLOBAL RISKS 2015”

EVENTUALE TITOLO EDIZIONE ORIGINALE

2. AUTORE : WORLD ECONOMIC FORUM

EVENTUALI NOTE SULL'AUTORE

Il **World Economic Forum** (<http://www.weforum.org/>) conosciuto anche come **Forum di Davos**, è un'iniziativa senza fini di lucro avviata nel 1971, con il patrocinio della Commissione Europea e delle associazioni industriali europee, dall'economista ed accademico Klaus Schwab con l'obiettivo di promuovere il confronto tra esponenti di primo piano della politica e dell'economia internazionale con intellettuali e giornalisti selezionati, per discutere delle questioni più urgenti che il mondo si trova ad affrontare.

Il WEF si considera "impegnato a migliorare la condizione del mondo" e si sforza di essere imparziale e privo di vincoli di natura politica, ideologica o nazionale, ma, principalmente a causa dei suoi stretti legami col mondo della finanza e dell'industria, le sue posizioni ed iniziative sono state costantemente e fortemente avversate dal mondo dell'ambientalismo e no global.

World Economic Forum

4. ANNO PUBBLICAZIONE 2015

il report può essere liberamente scaricato al seguente link (<http://reports.weforum.org/global-risks-2015/>), e possono altresì essere scaricati gli analoghi report prodotti negli anni precedenti

5. BANDELLA LATERALE con breve descrizione dei contenuti del “Libro Consigliato”

A global risk is an uncertain event or condition that, if it occurs, can cause significant negative impact for several countries or industries within the next 10 years.

A trend is defined as a longterm pattern that is currently taking place and that could amplify global risks and/or alter the relationship between them.

This 10th edition of the *Global Risks* report is published at a time of profound transformations to our global context. Ongoing political, economic, social, environmental and technological developments are challenging many of our underlying assumptions. Across every sector of society, decision-makers are struggling to cope with heightened complexity and uncertainty resulting from the world’s highly interconnected nature and the increasing speed of change.

Faster communication systems, closer trade and investment links, increasing physical mobility and enhanced access to information have combined to bind countries, economies and businesses more tightly together. In the coming decade – the time horizon of this report – our lives will be even more intensely shaped by transformative forces that are under way already. The effects of climate change are accelerating and the uncertainty about the global geopolitical context and the effects it will have on international collaboration will remain. At the same time, societies are increasingly under pressure from economic, political and social developments including rising income inequality, but also increasing national sentiment. Last but not least, new technologies, such as the Internet or emerging innovations will not bear fruit if regulatory mechanisms at the international and national levels cannot be agreed upon.

In a world where risks transcend borders and sectors, the motivations underlying the Global Risks report at its inception in 2005 – to shed light on global risks and help create a shared understanding of the most pressing issues, the ways they interconnect and their potential negative impacts – are more relevant than ever. The shared understanding of challenges is needed as a base for multistakeholder collaboration, which has seen increasing recognition as the most effective way to address global risks and build resilience against them. To further inspire action, in this year’s report we include a new section sharing examples of risk mitigation and resilience practices.

As in previous years, the report is based on the annual Global Risks Perception Survey, completed by almost 900 members of the World Economic Forum’s global multistakeholder community. This year’s report introduces a new distinction between risks and trends, which allows the highlighting of trends as an enlarged solution space to many possible risks. The report also presents deep-dive discussions of the risks posed by a resurgence of interlinked economic and geopolitical power plays, the rapid urbanization of the developing world and the exciting realm of emerging technologies, from synthetic biology to artificial intelligence.

The coming year offers unprecedented opportunities for much-needed collective action to address key global risks, such as the Sendai world conference on disaster risk reduction and the 2015 United Nations Climate Change Conference in Paris. As we mark the 10th anniversary of the report and highlight progress that has been achieved over the past decade, my hope remains that this work will contribute to the debate on how we think about global risks, mitigate them and strengthen resilience.

6. INDICE DEI CAPITOLI PRINCIPALI

Preface

Foreword

Executive Summary

Introduction

Box 1: How has the Global Risks report been used?

Part 1: Global Risks 2015

Box 1.1: The evolution of the risks of highest impact/likelihood

Box 1.2: The rising threat from non-state actors

Box 1.3: Asset bubbles – a new old risk?

Box 1.4: Recent advances in the global regulation of the financial system

Box 1.5: Black Sky – risks to critical infrastructure

Box 1.6: The road to Paris – is 2015 make or break for climate change?

Box 1.7: Governing the Internet – the need for mechanisms to maintain a unified and resilient network

Part 2: Risks in Focus

2.1 Introduction

2.2 Global Risks Arising from the Accelerated Interplay between Geopolitics and Economics

Box 2.1: Global supply chains – too lean?

Box 2.2: The World Economic Forum's work on geo-economics

City Limits: The Risks of Rapid and Unplanned Urbanization in Developing Countries

Box 2.3: Life in the city – how smart is smart?

Box 2.4: Health in cities – robust plans are needed to face the threat of pandemics

2.4 Engineering the Future: How Can the Risks and Rewards of Emerging Technologies Be Balanced?

Box 2.5: Classifying emerging technologies

Box 2.6: Synthetic biology – protecting mother nature

Box 2.7: Gene drives – promises and regulatory challenges

Box 2.8: Artificial intelligence – rise of the machines

Part 3: Good Practices on Risk Management and Risk Resilience

Conclusion

Appendix A: Description of Global Risks and Trends 2015

Appendix B: The Global Risks Perception Survey 2014 and Methodology

Appendix C: The Executive Opinion Survey and Views of the Business Community on the Impact of Global Risks on Their Business

Acknowledgements

7. PERCHE' CONSIGLIO QUESTO LIBRO (max 300 parole)

Consiglio questo libro perché, anche in lettura comparativa con i report prodotti negli anni precedenti, consente di focalizzare lo scenario dei rischi “sistemici” del nostro pianeta che caratterizzano e condizionano il benessere dei popoli e lo sviluppo economico.

I risultati dell’indagine, efficacemente ed estesamente rappresentati nel report (e in modo anche più utile in una parallela sezione “dinamica” del sito), possono aiutare a comprendere le complesse dinamiche sistemiche in cui si sviluppa la nostra azione, e possono anche, a mio parere, costituire un ottimo spunto di ragionamento per quanti sono coinvolti e/o interessati allo sviluppo e all’applicazione di una quanto mai necessaria “pedagogia della complessità”.
